LOCAL HEALTH STRATEGY

OUR WHY: Improving population health.

Healthy People. Thriving Communities. Bright Futures.

WHERE: Population health varies across the WWLHIN Sub-regions help us to better understand and address health inequities in each community.

Wellington / KW4 (Kitchener-Waterloo-Wellesley-Wilmot-Woolwich) / Cambridge-North Dumfries / Guelph-Puslinch

WHAT: To improve population health, we need to make it easy for people to be healthy, and to get the care and support they need.

OUR STRATEGIC APPROACH: Key enablers to creating a care community model that will make it easy and improve the health of the population.

Starting with the Patient Experience

We will listen, learn and be relentless in making improvements to the patient experience.

Igniting Innovation and Creativity

We will ignite innovation and creativity to exponentially impact the patient experience.

Empowering Clinical Leadership

We will work hand-in-hand with clinicians to improve the care experience and quality of care.

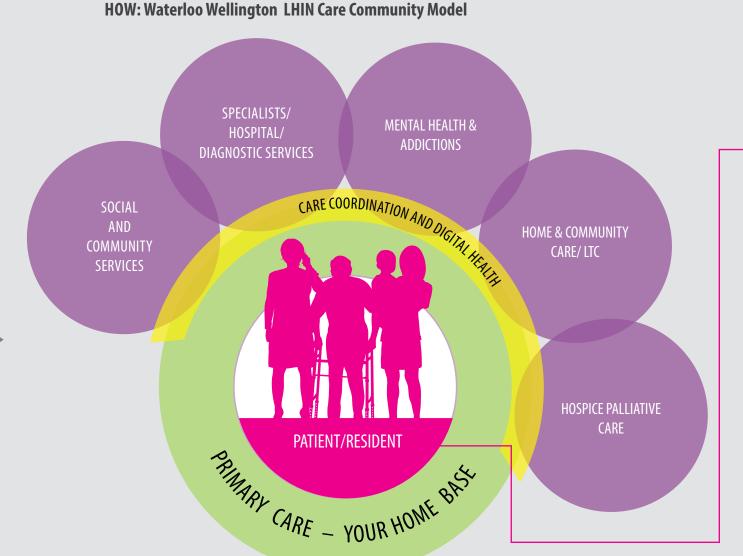

Driving through Community Leadership

We will be recognized as a trusted, credible and influential system leader in the community.

Creating a Great Place to Work

Great staff experience = Great patient experience.

Key Components

- everyone has access to a primary care "home" that meets them where they are at.
- primary care and patients are supported by system-wide care coordination and digital health tools that make access and navigation easy.
- patients and primary care benefit from better access to higher-quality specialty care.
- primary care has simple access to mental health and addictions, home and community care, LTC, and palliative care to seamlessly support their patients.

One way population health is improved is by wrapping a care community around each resident that best meets their needs.
